This all seems to be a survival of the mediaeval period when artisans made ing in some degree to save the situathe things used in a community as they tion by a timely dash of levity.-Puck. were needed.

In the United States we began at an early day to make things in large quantities by machinery, and all over the country we find articles of all sorts ready made, ready to use and ready to wear. In many of the London shops no attempt is made at attractive display either in the windows or on the counters. This does not apply to the more pretentious fronts in Regent Street and Bond Street, but even here window dressing is seldom done with the care that produces such artistic results as in the show windows of the better establishments in the United States,-London Letter to N. Y. Sun.

Judge Beaven's Candidacy.

It now looks as though Judge Beaven, of Fulton, will carry four of the five counties in this district for State Senator. It is Callaway's time to have this honor bestowed upon one of its favorite sons, and we are more than satisfied that if Judge Beaven is nominated and elected the entire district will have a representative in whom all will be proud. We feel, at this time, that Judge Beaven has a walk over for the nomination. He has the brains, ability, integrity and honesty, and we believe the Democrats of this district will pile up an overwhelming majority for him at the primary on speaker, clear thinker and aggressive fighter. He would make his influence felt upon the floor of the Senate. Price is a good fellow and will appreciate every vote he gets. You can make no mistake in voting for him.-Auxvasse (Callaway County) Review. Advelia : * 467. (Adv.)
